

Des Moines Public Schools  
Request for Proposal  
RFP 6971  
Inquiries & Responses

In Company Qualifications, Tab 1, it asks for 3 references related to a similar project. Then in Tab 2, it also asks for three references related to a similar project. Do you envision these being the same references or different? And if they're different, could you explain to me the distinguishing characteristics? **Same references can be used to satisfy the requirements**

Page 3 of the RFP provided background on the district. Please clarify the number of middle and high school campuses the Differentiated Learning System is intended to serve.

**We will include all middle and high schools, plus a few alternative settings. 10 middle schools, 5 high schools, and 3 alternative settings**

How many students per middle school and high school does the district anticipate will participate in the proposed program?

**The intended use is for tier 3 literacy intervention, with potential application into ELL and Sped (no more than 100 licenses per building)**

How many teachers will need professional development? **All teachers who teach reading intervention will need training. This is probably 50+.**

How many licenses are being requested or how many schools/students? **10 middle schools, 5 high schools**

Would you prefer Subscription or Unlimited users for the software? **Because we are only identifying software for tier 2 or 3 reading intervention, we are not looking for unlimited access. We will most likely only purchase a certain number of seats per school.**

Is it possible to see the evaluation criteria that the evaluation committee will be using? **The items listed in our RFP are the criteria**
